Re: GHG Environmental Performance Standard (EPS) Compliance Filing 2013

Pursuant to Ordering Paragraph No. 4 of Decision ("D.") 07-01-039, issued in R. 06-04-009 on January 25, 2007, California Pacific Electric Company, LLC (U 933-E) ("CalPeco") submits this annual Attestation Letter affirming that the financial commitments CalPeco has entered into for generation during the prior calendar year are in compliance with the greenhouse gas ("GHG") emissions performance standard ("EPS"). Specifically, CalPeco is in compliance with the EPS as it has no new ownership investment in generation facilities and no long-term financial commitments for generation.

**Effective Date:** March 15, 2013

**Tier Designation:** Tier 2 Designation

**Purpose**

This Attestation Letter provides information and documentation required by D.07-01-039. This Attestation Letter demonstrates that for 2012 CalPeco has entered into financial commitments that are in compliance with the EPS (long-term financial commitments defined on Page 3 of Attachment 7 in D.07-01-039).

## **Background**

D.07-01-039 requires all Load Serving Entities (“LSEs”) to file annual Attestation Letters, due February 15<sup>th</sup> of each year, attesting to the Commission that the financial commitments entered into for generation during the prior calendar year are in compliance with the EPS. D.07-01-039 requires LSEs to file Attestation Letters as an advice letter and serve the Attestation Letter on the service list in Rulemaking (“R.”) 06-04-009. This Attestation Letter is filed pursuant to that process.

D.07-01-039 requires LSEs to include a listing of long-term financial commitments of five years or longer that they have entered into during the prior year. Furthermore, D.07-01-039 requires additional documentation demonstrating that LSEs have complied with the EPS. Specifically, D.07-01-039 requires LSEs to provide documentation to demonstrate:

- (a) That the commitments were not “covered procurements” under the interim EPS rule and/or
- (b) For those that represent covered procurements, documentation demonstrating that such procurements are EPS-compliant, including any contracts with a term of five years or longer that include provisions for substitute energy purchases.
- (c) For any requested reliability-based exemptions that have been pre-approved by the Commission, a reference to the application and Commission decision number.

D.07-01-039 requires all LSEs to disclose the investment amount and type of alteration to retained generation, by generation facility and unit. D.07-01-039 also advises LSEs to present documentation regarding the design and intended use of the powerplant(s) underlying their new long-term financial commitments utilizing the sources of information listed in § 8341(b)(4), as well as any other sources of documentation that they believe will be relevant to this determination.

D.07-01-039 emphasizes that the key concept is to establish the design and intended use of the powerplant. Accordingly, documentation of the annualized plant capacity factor for the powerplant should include historical annual averages in order to help determine whether the plant is “designed and intended” to be used for baseload generation. D.07-01-039 requires LSEs to provide documentation of capacity factors, heat rates and corresponding emissions rates that reflect the actual, expected operations of the plant.

This Attestation Letter comports with the requirements outlined above.
