# Be the boss of your bills

## **Weatherize your home –**

Sealing air leaks around windows, doors and vents can help save energy and can make your home more comfortable.

## **Invest in Smart Tools –**

Smart thermostats, smart appliances and smart power strips all use technology to help you save.

**Look for labels –** When buying appliances, water heaters, electronics, light bulbs, toilets, faucet, shower heads, and more, look for ENERGY STAR® and WaterSense labels. Items with these labels are certified by the EPA to use less and can save you money on your utility bills.
