SPECIAL CONDITIONS

1. The fire protection service connection shall be installed by the utility with the cost paid by the applicant. Such payment shall not be subject to refund.
2. The minimum diameter for fire protection service shall be two (2) inches, and the maximum diameter shall be not more than the diameter of the main to which the service is connected.
3. If a distribution main of adequate size to serve a private fire protection system in addition to all other normal service does not exist in the street or alley adjacent to the premises to be served, then a service main from the nearest main of adequate capacity shall be installed by the utility and the cost paid by the applicant. Such payment shall not be subject to refund.
4. Service hereunder is for private fire systems which are regularly inspected by the local fire protection agency having jurisdiction and to which no connection for other than fire suppression purposes shall be made. Service shall be installed according to specifications of the utility and shall be maintained to the satisfaction of the utility. The utility will install the detector meter listed by the Underwriters Laboratories, Inc. or other device to indicate unauthorized use, leakage, or waste of water. The cost of such installation and the cost of the meter or other device shall be paid by the applicant.
5. The utility undertakes to supply only such water at such pressure as may be available at any time through the normal operation of its system.
