1. This Connection Fee Data Form is available to Class C and Class D water utilities and Class A and Class B utility districts or subsidiaries serving 2,000 or fewer connections. The blank Connection Fee Data Form must be filed in the tariffs of a utility seeking to assess a connection fee.

2. When the Connection Fee Data Form is filed in a utility's tariffs, the completed form showing costs of installation must be presented to all new individual customers seeking installation of a connection.

3. At the time a completed Connection Fee Data Form is presented to a customer, the utility must advise the customer, in writing, of the following:

   a. An applicant for a water utility connection who disputes the fees set forth by the utility in its Connection Fee Data Form may file a complaint with the California Public Utilities Commission, 505 Van Ness Avenue, San Francisco, California 94102-3298.

   b. An applicant for a water utility connection may, as an alternative to connection by the utility, have the connection performed by a contractor deemed qualified by the utility. Such installation must be done in accordance with utility specifications. Such installation is subject to inspection and approval of a utility, at an inspection fee rate of $_____ per hour. At completion of the installation, applicant must provide the utility with a copy of the contractor's invoice for the installation.

4. The Total Service Connection Cost (Line 38) represents a typical service connection in your service area for one service size. A separate calculation is required for each size.

5. Separate calculations are required for metered and flat rate service.

6. It is assumed that if procedures and equipment other than those included above are selected for a particular (but typical) installation (e.g., boring rather than trenching), it is because it is more economical for that particular installation. There is no need for special provisions for such cases.

7. The utility may request a deviation from its Connection Fees tariff and charge the actual cost of installation for any service for which the Total Cost of Service Connection exceeds the typical cost (Line 38) by three times.

8. Connection fees are assumed to be in the first $50,000 of income for which the federal income tax rate is 15%.
