

# Be the boss of your bills

## Get started with these saving tips

We want to help you save. A few small steps could add up to big savings.

**Weatherize your home** - Sealing air leaks around windows, doors and vents can help save energy and can make your home more comfortable.

**Invest in smart tools** - Smart thermostats, smart appliances and smart irrigation controllers all use technology to help you save.

**Look for labels** - When buying appliances, water heaters, electronics, light bulbs, toilets, faucets, shower heads, and more, look for ENERGY STAR® and WaterSense labels. Items with these labels are certified by the EPA to use less and can save you significant money on your utility bills.
