Advice Letter No. 63-G Alpine Natural Gas Operating Company No. 1, LLC (U 909G)

California Public Utilities Commission

Bear Valley Electric Service, Inc. ("BVES"), on behalf of itself, PacifiCorp, d/b/a Pacific Power ("PacifiCorp"), Liberty Utilities (CalPeco Electric) LLC, Southwest Gas Corporation, and Alpine Natural Gas Operating Company No. 1, LLC (collectively, "Joint Utilities"), submits this Advice Letter providing categorization and delivery models for the Energy Savings Assistance program measures.

SUBJECT: Joint Tier 2 Advice Letter on Energy Savings Assistance Program Treatment Measures Categorization per Decision No. 21-10-023.

PURPOSE

California Public Utilities Commission ("CPUC" or "Commission") Decision ("D.") No. 21-10-023 Ordering Paragraph ("OP") 21 directs the Joint Utilities to file a Tier 2 advice letter to categorize the Energy Savings Assistance ("ESA") program measures approved by D.21-10-023 into two basic categories of treatment levels, Basic and Plus. OP 22 of D.21-10-023 requires the Joint Utilities to file as part of the Tier 2 advice letter, which set of measures will be part of the Basic or Plus offerings, including those provided through self-certification and those that are exempt,.

This advice letter is submitted in compliance with OP 20, 21, and 22 of D.21-10-023.

BACKGROUND

The ESA program provides weatherization services and energy efficiency measures to help low-income households (single family, in-unit multifamily, and mobile homes) conserve energy and reduce energy costs while improving health, comfort, and safety. The ESA program provides information and education to promote energy efficient practices in low-income communities. The Joint Utilities' most recent ESA program, PY 2021-2026, was approved in D.21-10-023. The Commission issued D.21-10-023 on October 21, 2021.

ESA PROGRAM MEASURES

D.21-10-023 approved program measures for each of the Joint Utilities. Each utility has various offerings. D.21-10-023 orders the Joint Utilities to meet and confer, and outline its categorization of ESA program measures into two treatment level categories: Basic, and Plus.

As ordered, the Joint Utilities convened over the course of several weeks to develop and provide the following:

- List of ESA program treatment measures offered by each utility.
 - Categorization of each utility measure's treatment level as Basic or Plus measure
 - Determination of Joint Utility alignment on treatment measures as "Basic" or "Plus" and discussion on any difference.
 - Alignment indicates if a measure is offered by all Joint Utilities (per relevant utility type) as a "Basic" or "Plus" measure.
- Allowance for Self-Certification.
- Reporting Categories and Segments definitions.
- Reporting Categories and Segments methodologies.
- Utility alignment regarding Categories and Segments definitions, and methodologies.
 - Explanation of deviations among utilities.

See attachment A and attachment B.

ATTACHMENTS

Attachment A: List of Measures, Segments and Treatment Tiers (PY 2021 – 2026) Attachment B: List of Reporting Categories and Segments - Definitions and Methodologies (PY2021 - 2026)

COMPLIANCE

This advice letter is submitted in compliance with D.21-10-023.

TIER DESIGNATION

This advice letter is submitted with a Tier 2 designation.

EFFECTIVE DATE

The Joint Utilities respectfully request this advice letter becomes effective on March 21, 2022, which is thirty (30) days after submission.

NOTICE AND PROTESTS

A protest is a document objecting to the granting in whole or in part of the authority sought in this advice letter. A response is a document that does not object to the authority sought, but nevertheless presents information that the party tendering the response believes would be useful to the CPUC in acting on the request.

A protest must be mailed within 20 days of the date the CPUC accepts the advice letter for submission. The Calendar is available on the CPUC's website at <u>www.cpuc.ca.gov</u>.

A protest must state the facts constituting the grounds for the protest, the effect that approval of the advice letter might have on the protestant, and the reasons the protestant believes the advice letter, or a part of it, is not justified. If the protest requests an evidentiary hearing, the protest must state the facts the protestant would present at an evidentiary hearing to support its request for whole or partial denial of the advice letter.

The utility must respond to a protest within five days.

All protests and responses should be sent to:

California Public Utilities Commission, Energy Division E-mail: <u>EDTariffUnit@cpuc.ca.gov</u>

The protest or correspondence should also be sent via U.S. mail and/or electronically, if possible, to the Joint Utilities at the addresses shown below on the same date it is delivered to the Commission.

For Bear Valley Electric Service, Inc.: ATTN: Nguyen Quan 630 East Foothill Blvd. San Dimas, CA 91773 Fax: 909-394-7427 E-mail: <u>Regulatory Affairs@byesinc.com</u>

These burdens include poverty, high unemployment, air and water pollution, presence of hazardous wates as well as high inclidence of asthma and heart disease. One way that the state identifies these areasis by collecting and analyzing information from communities all over the state. CalifovrioScreen, an analytical tool created by the California Environmental Protection Agency (CalEPA), combines different types of causus tract-specific information into a score to determine which communities are the most burdened or "disadvantaged." Inset a city or town in the CalEnviroScreen map's search box here to see if it is considered a disadvantaged community in this context. https://oehha.ca.gov/calenviroscreen/sb535 (Pursuant to Section 39711 of the Health and Safety Code, the California Environmental Protection Agency (CalEPA) developed a means for identifying disadvantaged communities. See D.18-05-041 p. 39.) The Goldsmith definition is used to determine rural and urban eligibility and participation for ESA and CARE Programs. Rural areas are defined as all population, housing and territory not included within an urbanized area or urban cluster. Census blocks are identified as urban if they have a density of 1,000 people per square mile. These blocks are then aggregated to define urbanized areas that contain 50,000 or more people and urban clusters are areas with at least 2,500 but fever than 50,000 people. (Reflected in Athens Research annual eligibility update filed February 12 of each year (0.21-06-015)). The Commission's Tribal Consultation Policy defines "California Native American tribe" as a Native American Tribe located in California that is on the contact list maintained by the Native American tribe. California Native American tribe areas with at least 2,500 but fever than a diversity of timates not seen in other states, and the statewide provisions adopted into the California Energy Code accounts for th	Not applicable to all SMJUs service territories At this time, not all SMJUs currently track or report this data.
