**ACCOUNT ACTIVITY** Charge Explanation

Base Usage 521.50 kWh  
 Excess Usage 1518.50 kWh

Customer Charge	A flat fee that covers costs related to the meter and fixed administrative costs such as meter reading, billing data processing and postage.
California Surcharge	A surcharge collected and passed through to the California Energy Commission. The surcharge is based on electric usage during a billing period. This surcharge applies to all electric sales rendered under all tariff rate schedules authorized by the Commission, with the exceptions of interdepartmental sales or transfers and sales to electric public utilities. *In 1983 the Legislature established the Public Utilities Commission Reimbursement Fee to be paid by utilities to fund their regulation by the Commission (Public Utilities (PU) Code Section 401-443). The surcharge is to recover the cost of that fee is ordered by the Commission under authority granted by PU Code Section 433. This charge is based on the amount of kilowatt-hours (kWh) used by a customer.
CPUC Surcharge	
Distribution Charge	This charge recovers costs for utility infrastructure used to deliver electric energy from the transmission system to a customer's premises, including expenses for operation and maintenance of this infrastructure. This charge is based on the amount of kilowatt-hours (kWh) used by a customer.
Public Purpose Programs (PPP)	This charge is to fund programs that were created by the California Legislature to benefit society generally like energy efficiency and low-income ratepayer assistance programs. This charge is based on the amount of kilowatt-hours (kWh) used by a customer.
Energy Cost Adjustment Clause (ECAC)	The current cost associated with fuel and power purchases. Liberty Utilities produces power from its generating plants and purchases power from wholesale suppliers and delivers that power to customers. This charge is based on the amount of kilowatt-hours (kWh) used by a customer.
Generation Charge	This charge is for the non-fuel costs related to the operation and maintenance of Liberty Utilities electric generating facilities. This charge is based on the amount of kilowatt-hours (kWh) used by a customer.
ECAC Amortization	The under – or over – recovery of prior period fuel and power costs incurred by the company on behalf of its customers. This charge is based on the amount of kilowatt-hours (kWh) used
Vegetation Management Charge	These costs cover ongoing tree-trimming and vegetation removal expenses. This is the charge associated with the costs Liberty Utilities incurs for its vegetation management program. This charge is based on the amount of kilowatt-hours (kWh) used by a customer.
Carbon Pollution Permit Cost	This is the charge to recover Liberty Utilities' Greenhouse Gas compliance obligation costs under California's Cap-and-Trade Program. This charge is based on the amount of kilowatt-hours (kWh) used by a customer.
Solar Incentive Program (SIP)	The SIP balancing account is to record the difference between the Solar Initiative Program revenue requirement and Liberty's Solar Initiative Program expense. This charge is based on the amount of kilowatt-hours (kWh) used by a customer.
Catastrophic Event Memorandum Account (CEMA)	CEMA is an account that reimburses a utility for unforeseen and unforecasted expenses caused by catastrophic events such as major winter storms or fires. This charge is based on the amount of kilowatt-hours (kWh) used by a customer.
Base Revenue Requirement Balancing Account	BRRBA records the difference between Liberty's authorized annual base rate revenue requirements and the annual recorded revenue from base rates as set by the CPUC. Base rates are electric rates and related adjustments. Adjustments are required to amortize under collections or over collections in the BRRBA authorized by the commission from time to time. This charge is based on the amount of kilowatt-hours (kWh) used by a customer.
Climate Credit	This credit comes from a California program that is fighting climate change. Visit Climate Credit for more information
