

Liberty Utilities Commercial Incentives Program

Background

The Liberty Utilities Commercial Incentives Program is designed to help business owners save money as well as energy. This program is offered to all non-residential customers. Rebates are provided for both retrofits and new construction.

You can receive rebate incentives by upgrading your business or facility with energy efficient lighting and appliances. The rebates will provide your business with a return on your investment in the short term, and the energy efficient upgrades will help save both energy and money in the long term.

Process

To apply for the program and receive your rebates:

1. Submit an application on our website and provide project details such as: quantity of fixtures being replaced and type(s) of fixtures that will be upgraded or installed.
2. A pre-inspection by a Liberty auditor will be conducted.
3. Installations are performed and completed.
4. Post-inspection will be conducted by a Liberty auditor after installations.
5. Project closing documents will need to be executed/signed as well as providing paid invoices.
6. Incentives payment will be processed and mailed via check to customer.

Questions

Please call 530-543-5239 to request a FREE Commercial Energy Audit of your business or facility to assist in the planning and implementation of energy efficiency upgrades. Submit inquiries to CAEnergyEfficiency@libertyutilities.com.
