

Cross Connection Survey

New Residential Customers

To be completed by the property owner or their authorized agent.

This questionnaire aims to help determine if you have any special plumbing or activities that pose an increased risk of contamination to Liberty's water system. Please complete the following questionnaire and check the appropriate boxes that apply to your property.

Backflow prevention assemblies shall be installed at all service connections where in the judgment of Liberty and the nature of activities on the premise may present a nuisance or hazard to the public water system. Residential properties may be required to provide premise isolation as minimum protection. Installed devices are required to be tested annually, and the test results and certification must be provided to Liberty.

Type of Residence: Single Family Multi-Family Townhouse/Condo Other _____

Property Site Address: _____

Owner's Name: _____ Owner's Address: _____

Owner's Phone Number: _____ Owner's Email Address: _____

Place a check next to all equipment and fixtures listed below that are or will be connected to water for use at your project or residence.

Certification: Under penalty of perjury, I (the undersigned) certify that I am the property owner or their authorized agent and that the above information is complete and accurate to the best of my knowledge. I understand that any changes in equipment connected to the water system must be reported immediately to Liberty as a condition of continued service. I understand that failure to report changes or provide yearly test reports of installed backflow protection devices may result in Liberty interrupting water service to the premises. I agree not to cause or maintain, temporarily or permanently, any cross-connection between plumbing pipes or water fixtures and the public water system.

Safe Drinking Water Is Priceless

Safe drinking water is priceless. Unlike other utility services such as gas or electricity, tap water is consumed.

Federal, state, and local regulations require drinking water to meet quality and safety standards. Liberty takes these regulations seriously and not only meets them, but often exceeds them.

Treated water, however, can become contaminated within the water distribution system by cross connections that result in backflow occurrence.

We Can Help
