Update your info to stay connected this fire season

As fire season begins, there may be an increased potential for Public Safety Power Shutoffs (PSPS). A PSPS is a last-resort safety procedure where power is temporarily shut off during severe weather or high fire risk conditions to reduce wildfire risk.

If your home or business may be impacted by a PSPS, Liberty will provide notifications through phone calls, text messages, and/or emails using the contact information on file. That's why **it is important to confirm your phone number and email address are up to date** so you can receive timely emergency alerts and important updates.

Customers can confirm or update their contact information by calling 1-800-782-2506 or through My Account. To access My Account, **scan the QR** code or visit www.libertyenergyandwater.com.
