

# **Electric Rates Explained**

#### **How Are Rates Determined?**

As a regulated utility, Liberty's rates must be approved by the California Public Utilities Commission (CPUC). Rates reflect the cost to provide customer care, emergency and outage services, maintenance and improvement of infra-structure, and recovery of operating costs to serve customers safely and reliably. Costs are a direct pass-through to the customer with a CPUC-approved return on investment. A significant portion of your bill is for purchased energy costs.

Liberty may adjust rates to reflect costs through a rate request. The CPUC requires submission of a rate request every three years; other rate adjustments may occur through advice letters and applications. The CPUC reviews the detailed requests and may make modifications before a decision is rendered.

Once rates are approved, they become part of a larger Tariff document. Tariffs are a detailed accounting of the services we deliver, our rates for those services, and the policies we adhere to. You can view those Tariffs on our Rates webpage at www.libertyenergyandwater.com.

### What is my Rate Class?

Rates are categorized by rate class, with each rate class assigned specific charges. In general, there are four rate classes:

- Residential (Domestic) Service (D-1)
- Small Commercial Service (A-1)
  Less than 50 kW demand per month.
- Medium Commercial Service (A-2)
  Between 50 kW and 200 kW demand per month.
- Large Commercial Service (A-3)
  Greater than 200 kW demand per month.

There are additional rate classes within each of these four general categories such as Time-Of-Use rates and CARE (California Alternate Rates for Energy). Please see the individual rate schedules (or Tariffs) for this information as well as each rate class' qualifications.

#### How do I know what rate class I'm in?

Customers can look on their bill statement for their rate code. This code corresponds to a rate class. Below are the rate classes with corresponding rate codes.

- Residential Rate Class Codes (D-1):
- Small Commercial Rate Class Codes (A-1):
- Medium Commercial Rate Class Codes (A-2):
- Large Commercial Rate Class Codes (A-3):

### How am I charged?

Your rate class and code determines how you are charged as defined by CPUC-authorized Tariffs. Below are the various charge categories customers may see on their bill.

Customer Charge: per meter; per month.

Energy Charge (use): Per kWh.

**Other Energy Charges:** These are single-line items on your bill; many of them are CPUC requirements.

**Demand Charge:** Per kW of Maximum Demand per month; different for winter and summer; this is the energy demand on the system, not the actual usage. This is for Medium Commerical (A-2) and Large Commercial (A-3) customers only.

**Facilities Charge:** Per kW of Maximum Demand per month. This is for (A-3) customers only.

Additional Charges: There are additional line-item charges on your bill as authorized and required by the CPUC. Please visit our website for details.

### How is my bill calculated?

Your bill is calculated based on the applicable rate class using the CPUC-approved Tariff charges. Bills are based on the meter read for a 27 to 33 day period.

### **Summary Rate Schedules**

The following pages provide a summary of Liberty's Rate Tariffs as approved by the California Public Utilities Commission as of the date on this document. All costs given are for all kWh, per kWh (usage) and applied to both Base and Excess of Base usage unless otherwise noted. Rates are presented for the four major customer classes in summary format for easier customer review. Customers are encouraged to visit the individual Rate Tariff Sheet, Understanding Your Bill, and Electric Rates and Tariffs webpages on www.libertyenergyandwater.com or call 1-800-782-2506 for further explanation.

# Residential (Domestic) Service (D-1)

(Updated 9-1-2025)

# Residential (Domestic) Customers (D-1) Types

**Permanent:** Permanent place of residence. Bills are calculated using two different rates: discounted rate (known as baseline allowance) and a rate for electricity used in excess of the baseline allowance. The baseline amount is different for winter and summer.

**Non-Permanent:** Not permanent place of residence; a second home or vacation rental. The baseline (discounted) rate does not apply to secondary residences.

**CARE:** California Alternate Rates for Energy; a discounted rate for income-qualified primary customers.

### Time-of-Use Rates

Customers who use less electricity during periods when total energy demand is highest (the peak), may save money by shifting their usage to times with lower rates.

Liberty now offers TOU rates to both residential (D-1) and small and medium commercial (A-1 and A-2) customers.

### Electric Vehicle Time-of-Use Rates

Customers who own an electric vehicle and charge it at their Liberty service address may benefit from TOU-EV rates.

All electric usage – not just EV charging – is measured and billed according to these rate schedules.
