

Fall/Winter 2025

Conservation Newsletter

WATER WISE, WALLET WISE

Being water wise can help you manage your household costs while making the most of every drop. Simple habits add up to benefits for both your home and your community.

DID YOU KNOW?

Toilets are the #1 indoor water waster! Hear it running? A quick repair can make a big difference!

DID YOU KNOW?

Most plants need far less water in fall and winter.

Check out these Smart Watering Tips:

- Water deeply, but less often.
- Don't overwater—lawns need less than you think.
- Collect rainwater for your plants.
- Keep sprinklers and irrigation systems maintained.
- Add mulch to help soil hold moisture.
- Choose native or drought-tolerant plants.

CONSERVATION PROGRAMS:

Conservation Kits:

Simple Tools, Big Impact

Easy-to-use kits to fit your home's needs, indoors and out. The kits offer water efficient tools and devices that are quick to install.

Water Audit Program:

Audit Today. Save Tomorrow.

Find out where water is going in your home and how you can save. Call WaterWise Consulting at 1-866-648-2925 to schedule your audit.

Weather Based Irrigation Controllers:

The Smart Way to Water

Replace your standard irrigation controller with a controller that adjusts automatically to the weather. Call WaterWise Consulting at 1-866-648-2925 to learn more.

SABIO CON EL AGUA, SABIO CON EL DINERO

Ser consciente con el uso del agua puede ayudarle a reducir los gastos del hogar y aprovechar cada gota. Los hábitos sencillos generan beneficios para su casa y su comunidad.

¿Sabía que?

La mayoría de las plantas necesitan menos agua en otoño e invierno.

Consejos para un riego eficiente:

- Riegue profundamente, pero con menos frecuencia.
- No riegue en exceso, el césped necesita menos de lo que cree.
- Recolecte agua de lluvia para sus plantas.
- Mantenga los aspersores y los sistemas de riego en buen estado.
- Agregue mantillo para ayudar a que la tierra retenga la humedad.
- Elija plantas nativas o tolerantes a la sequía.

PROGRAMAS DE CONSERVACIÓN

Kits de Conservación: Herramientas Simples, Gran Impacto

Kits fáciles de usar que se adaptan a las necesidades de tu hogar, tanto en interiores como en exteriores. Incluyen herramientas y dispositivos eficientes en el uso del agua que se instalan rápidamente.

Programa de Auditoría de Agua: Audita Hoy. Ahorra Mañana.

Descubre en qué se utiliza el agua en tu hogar y cómo puede ahorrar. Comuníquese con WaterWise Consulting al 1-866-648-2925 para coordinar su auditoría.

WBIC: La Forma Inteligente de Regar

Reemplaza tu controlador de riego tradicional por uno que se ajusta automáticamente al clima. Comuníquese con WaterWise Consulting al 1-866-648-2925 para obtener más información.

Protecting our drinking water

Liberty delivers quality drinking water to homes and businesses. Our **Cross-Connection Control Program** helps to protect drinking water from pollution or contamination, even when it's flowing through the distribution system.

What is a cross-connection?

A cross-connection is an actual or potential connection between the drinking water supply and a source of contamination or pollution. Cross-connections must be properly protected or eliminated.

What is a backflow?

Water distribution systems are designed so that water flows in one direction from the distribution system to the consumer. However, certain conditions can cause an undesirable backflow, in which the water flows in the opposite direction and carries other contaminants or pollutants into the public drinking water supply through a cross-connection.

Residential customers

Help us protect Liberty's drinking water by eliminating unprotected cross-connections! One way to do this is by completing the Residential Cross-Connection Plumbing Survey on our website.

Industrial, commercial, and institutional property owners

State and local regulations require all industrial, commercial, institutional, and multi-residential property owners to survey cross-connections in their water systems, test their backflow preventers, and install or repair any required backflow preventers at their own expense.
