

A Message from the California Public Utilities Commission

California Climate Credit bill relief from the Cap-and-Invest Program

This fall* your utility bill will include a \$71.98 credit identified as the "California Climate Credit." Small businesses will receive their credit in October, while residential customers will receive their credit in November. Your household and millions of others throughout the State will receive a similar credit on their utility bill.

The California Climate Credit is a direct result of the State's nation-leading Cap-and-Invest Program that requires polluters to pay for climate pollution.

Credits appear automatically on your bill and are designed to help utility customers during the transition to a more sustainable future.

Since 2014, California's Liberty Utilities households like yours have already received an average of \$1,057 in California Climate Credits on your electric utility bills, totaling more than \$10 billion in Cap-and-Invest Program cumulative benefits statewide.

California is taking action to reduce electricity bills when they are highest. In 2026, Liberty's residential customers will receive the Climate Credit in April and November*. Beginning in 2027, the credit will be distributed in October and November. The credit for small businesses remains unchanged in April and October.

For more information about the Climate Credit, visit www.cpuc.ca.gov/climatecredit.

For more information about additional programs that are funded by the Cap-and-Invest Program to reduce carbon pollution, improve public health and the environment, and provide meaningful benefits to the most disadvantaged communities, visit www.caclimateinvestments.ca.gov.

* Billing periods vary by utility and may not always coincide with a calendar month. If you don't see a Climate Credit in the bill that arrives this month, it will appear in the bill you receive next month.

The CPUC regulates privately owned electric and natural gas companies and serves the public interest by protecting consumers and ensuring the provision of safe, reliable utility service and infrastructure at reasonable rates, with a commitment to environmental enhancement and a healthy California economy.

For more information about our work, visit www.cpuc.ca.gov. If you have a question or complaint concerning a privately owned utility, call 1-800-649-7570 or visit www.cpuc.ca.gov/utilitycomplaint.

2025 Power Content Label

Do you know where your power comes from?

Electric providers are required to provide customers with an environmental power content label with information to evaluate services offered by competitive suppliers and electric utilities, and to provide information about the environmental and public health impacts of electric generation.

Liberty Utilities (CalPeco Electric) LLC 2025 Power Content Label			
Emissions, Power Sources, Unbundled RECs	Liberty Utilities (CalPeco Electric) LLC (Retail Sales)	Liberty Utilities (CalPeco Electric) LLC Total (Retail Sales, Other End Uses, & Losses)	CA Utility Average (Retail Sales, Other End Uses, & Losses)
Greenhouse Gas Emissions Intensity (lbs of CO ₂ e emitted per megawatt hour)	601	622	384
Renewables and Zero-Carbon Resources	46%	44%	67%
Fossil Fuels	54%	56%	33%
Biomass & Biogas	0%	0%	2%
Geothermal	20%	19%	5%
Eligible Hydroelectric	0%	0%	1%
Solar	21%	20%	25%
Wind	0%	0%	14%
RPS Eligible Renewables - Subtotal	41%	39%	46%
Large Hydroelectric	0%	0%	10%
Nuclear	0%	0%	10%
Emerging Technologies	0%	0%	0%
Other	0%	0%	0%
Natural Gas	0%	0%	11%
Coal & Petroleum	0%	0%	2%
Unspecified Power (92% fossil fuels)	59%	61%	21%
Total	100%	100%	100%
Retail sales covered by retired unbundled RECs	9%	N/A	N/A
■ This label does not reflect compliance with the Renewables Portfolio Standard (RPS), which measures the use of tracking instruments called Renewable Energy Credits (RECs) over the course of multi-year compliance periods. RECs that are purchased separately from the renewable energy ("Unbundled RECs") can be used for RPS compliance, but they do not factor into the power mixes or GHG emissions intensities above. ■ GHG intensity figures exclude biogenic CO₂ and emissions from geothermal sources and grandfathered imports of firmed-and-shaped energy. For detailed information about all GHG emissions from California's retail electricity suppliers, visit the CEC webpage at the link below. ■ Unspecified power is electricity purchased from a genericized pool on the open market. In 2025, 92% of unspecified power came from fossil fuels (natural gas, coal, and petroleum) and 8% came from renewables and zero-carbon resources (RPS-eligible and other renewables, large hydroelectric, and nuclear).
