Public Safety Power Shut Offs

The "Public Safety Power Shutoff" (PSPS) program was developed by electric utilities such as Southern California Edison (SCE) as a preventative measure of last resort if the utility reasonably believes that there is an imminent and significant risk that strong winds may topple power lines or cause major vegetation-related issues leading to increased risk of fire. During such events, the utility will proactively turn off power in high fire risk areas.

SCE PSPS Status

- Normal
- Monitored
- De-Energized

Disclaimer: Erratic or sudden onset of conditions may impact the ability to provide advanced notice to customers. Other notifications may occur as needed to keep customers informed.

Planning & Monitoring

Customer Notification Triggers	4-7 Days Ahead	3 Days Ahead	2 Days Ahead	1 Day Ahead	1-4 Hours Before
SCE Action	When extreme weather is forecast, planning begins for potential PSPS	Initial notifications sent about possible power shutoff to local and tribal governments, emergency officials, first responders, hospitals, and other critical infrastructure and service providers	Initial notifications sent to customers, updated notifications sent to local government and agencies	Update notifications sent, including any updated timing information	Whenever possible, notifications sent that power will be shut off
Mono County Action			Updates made to public PSPS map & portal with impacted circuits and Period of Concern	Updates made to public PSPS map & portal with impacted circuits and Period of Concern	<ul style="list-style-type: none"> - Genasys & iPAWS notification from Sheriff - Social media updated with info as available - Map updates on public portal

GET READY EMERGENCY RECOVER

Customer Notification Triggers	Power Shutoff	Preparing for Re-energization	Power Restoration	PSPS All Clear
SCE Action	Notifications sent that power has been shut off	Notifications sent before re-energization occurs. Field crews inspect equipment to determine it is safe to restore power.	Notifications sent that power has been restored	Notifications sent to customers on circuits that are no longer being considered for PSPS
Mono County Action	<ul style="list-style-type: none"> - Genasys & iPAWS notification from Sheriff - Social media updated with info as available - Map updates on public portal 	<ul style="list-style-type: none"> - Social media updated with info as available - Map updates on public portal 	<ul style="list-style-type: none"> - Social media updated with info as available - Map updates on public portal 	<ul style="list-style-type: none"> - Social media updated with info as available - Map updates on public portal

Definitions:

- Genasys: An opt-in registry used by the Sheriff to notify of emergencies (formerly known as Zonehaven)
- iPAWS: An 'Amber Alert'-like service sending notice to cell phones in the area

CalFresh Benefits Replacement Available for Families Impacted by Power Outages

Are you a CalFresh recipient whose food spoiled due to the power outages?

You can request a replacement of your CalFresh Food benefits if your food spoiled due to a power outage. You have at least 10 days after the food was lost to request the replacement; an extension to 30 days may be available. **Contact your local county office for help.**

How do I request a replacement of my CalFresh Food benefits?

Contact your local county office. You will need to complete, sign, and turn in a 'CF 303' form to request a replacement. Include your contact information and a short description of how your food was lost. Include the time and date of the power outage.

- Call **1-877-847-3663 (FOOD)**
- Come in/find an office at **CalFreshFood.org**

Won't my local county office be closed because of the power outages?

We recommend calling your county office before visiting in person to make sure they are open. They may also be able to help you by phone.

For other languages, or reasonable accommodations, find an office at CalFreshFood.org. For speech and/or hearing assistance call 711 Relay.

Funded by USDA, an equal opportunity provider and employer.

How do PSPS events work?

When forecasts indicate elevated weather conditions, SCE will begin assessing the potential impact to affected areas. They will analyze historical data to help predict the likelihood of a wildfire occurring, closely monitor weather watch alerts from the National Weather Service (NWS), and place incident responders on alert, if needed. Note that erratic or sudden onset of conditions may impact their ability to provide advanced notice to customers, however, so it is important to always be prepared.

Who will be subject to PSPS?

The PSPS program is aimed at any high fire risk area - which essentially encompasses all of Mono County. This means that there is the possibility that any community in the County could be subject to a planned power shutdown if the weather conditions become extreme enough. The [map](#) above shows all of SCE's electrical circuits and their status based on current weather conditions and events.

How long do PSPS events last?

Depending on the severity of the weather and other factors, power outages could last several hours or multiple days – so it's important you and your family have an emergency plan in place. Power will remain out for as long as extreme and dangerous weather conditions pose a potential fire risk. After a Public Safety Power Shutoff event, your energy company will inspect and repair power lines and equipment so that power can be safely restored.

Will my phone and internet continue to work during a power outage?

Phone and internet service is critically important during a power outage, as it provides a means for communicating with customers as events unfold, as well as reaching emergency services during times of need. Here are some things to consider:

- If you absolutely must have phone service during a power outage, you should purchase a 'landline' through Frontier and ensure that the phone you have in your house does not require power (these are frequently called these "Princess Phones").
- The two major local cell phone companies (Verizon Wireless & AT&T) have power resiliency plans and their network should generally remain operational during a power outage. It is important to recognize that these networks become heavily saturated during outages, however, as a lot of people use them for internet. **Make sure your cell phone is well charged.**

GET READY EMERGENCY RECOVER

Internet at your home, however, you will also need to ensure that your modem and wireless router have power.

Will 911 continue to work during a power outage?

Yes. The Mono County 911 Dispatch Center has generator power with multiple layers of redundancy. As long as you can dial 911 from a phone, it will go through to a dispatch center.

How do I prepare for a PSPS event?

Here are some helpful links to information provided by SCE for keeping safe and comfortable during a PSPS event.

- [PrepareForPowerDown.com](#)

Medical baseline customers: If you depend on powered medical equipment, you should plan to have a backup power source, such as an uninterruptible power supply, or a backup location in case of a power outage.
