

Take control of your bills – Get started with these saving tips

We want to help you save. A few small steps could add up to big savings.

 **Look for leaks** – Leaks are sneaky and can waste a lot of water over a short period of time, adding up to wasted money. Check faucets, toilets, and shower heads to see if there is opportunity for you to save.

 **Upgrade to smart controllers** – Smart thermostats, smart appliances, and smart irrigation controllers all use technology to help you save.

 **Look for EPA labels** – When buying appliances, water heaters, electronics, light bulbs, toilets, faucet, shower heads, and more, look for ENERGY STAR® and WaterSense labels. Items with these labels are certified by the EPA to use less and can save you significant money on your utility bills.
