SUMMER 2018

WATER SAVINGS Programs & Rebates

California has a history of off-and-on dry periods, and significant droughts. Therefore, it is important for us to be good water stewards. Liberty Utilities wants to help you to find the best ways to use your water wisely. Here are some water savings programs and rebates from us to you.

Request Water Savings Device

We offer the following upon request at no cost to you.

- Shower Timers
- Bathroom Faucet Aerators
- Dish Scrapers
- Dye Tablets for Leaks
- Hose Timers
- Kitchen Faucet Aerators
- Soil Moisture Meters
- Water Efficient Hose Nozzles
- Toilet Flappers

Schedule a Home Survey

We understand that every home and family has different needs. That's why we will evaluate your home water use for free to find what works best for you, your home, and your family.

SoCal Gas Partnership

We partner with the Southern California Gas Company's Energy Savings Assistance Program to offer water and energy saving devices. For inquiries, call 1-800-331-7593.

These are just some of the ways we are here to help our customers **LIVE. Play. CONSERVE.**

Toilet Programs

We offer delivery of up to two Ultra-High Efficiency (0.8 gallons per flush toilets) to qualifying homes at no cost. Customer is responsible for installation. For California Alternate Rates for Water (CARW) qualifying customers, we offer delivery and installation at no cost.

Please note: Liberty Utilities will never send someone door-to-door offering to install toilets. In order to participate in our programs, you must apply first and an appointment will be scheduled at a time that is most convenient for you.

Rebates for Water Savings Devices

Go to www.socalwatersmart.com to find qualifying products. Start a rebate application. Purchase a qualifying product. Complete the online rebate application.

Some examples of rebate eligible products are:

- Rain Barrels
- High Efficiency Clothes Washer
- Landscape Rotating Nozzles
- Soil Moisture Sensor System
- Weather-Based Irrigation Controller

Turf Removal Rebate Program

It's back in your area! Go to www.socalwatersmart.com for details.

For any questions about our programs, rebates or to schedule a water survey at your home, please contact Sarah Rae, Water Conservation Coordinator. conservation@libertyutilities.com or 562-299-5126.

Involved in Our Communities. Supporting Our Future.

At **Liberty Utilities**, we live out our commitment to being local, responsive, & caring. We believe in our communities and support the future by giving back to our youth.

At Norwalk's Career Fair, Liberty Utilities provided students with resources and knowledge about the water industry to make career decisions.

Over the summer, Liberty Utilities is hosting two interns from Norwalk-La Mirada Unified School District for 6 weeks.

Both Christian and Evelyn are interested in pursuing engineering careers. Our departments will teach them what it takes to be in the water industry. We are as excited to host as they are to learn!

We were honored to give Adrian, a senior at John Glenn High, a \$500 scholarship towards his studies UC Santa Barbara to achieve the greatness he is destined for.

**Local & Responsive.
We Care.**

We participated in Compton Unified School District's STEAMFest in May. Our engineers and operators interacted with the students to teach them the science, technology, engineering, and math portions of their jobs.

THE VALUE OF WATER

Where Your Water Comes From

DID YOU KNOW?

45.9%

of your water is
**purchased and
imported** from the
Sacramento River and
the Colorado River

How is our water imported?

Metropolitan Water District imports water from Northern California via the State Water Project and from the Colorado River via the Colorado River Aqueduct. About **45%** of Southern California's entire water supply comes from these two sources.

About **30%** of Southern California's water comes from the State Water Project, the largest state-built water and power system in the nation. The project runs from Lake Oroville in Northern California to Southern California, crossing the Sacramento-San Joaquin Delta along the way. The Colorado River Aqueduct is 242-miles long from the Colorado River at Lake Havasu west of the California/Arizona border.
